# Institutional self-evaluation of learning and teaching programmes

a case study

# "Programme evaluation" in Quality Assurance Context

- HEQC
  - institutional audits
    - Self-evaluation based on criteria
    - Site Visit
    - Follow-up
  - Programme accreditation
    - Self-evaluation based on criteria
    - Site Visit
    - Accreditation decision
    - Follow-up
- At institutional level IQAMS

### Challenging the "management" of quality

- Is "managerialism" not contradictory to the nature of a university?
- What happened to
  - collegial governance?
  - academic freedom?
  - institutional uutonomy?
- Bureaucratisation!!
- "Management" of quality used to cover for poor quality?
- More <u>management</u> of quality results in less <u>quality...</u>

#### A lecturer's view of QA

- "If good academics are appointed at universities, we do not need QA systems. If the wrong people are appointed, no document (however thick it is), will ensure quality"
- If nobody steals anything, we do not need laws and police. If there are thieves, no law (however thick it is), will ensure that no theft takes place.
- If nobody is ill, we do not need doctors. Since we know beforehand that everyone is in any case going to die some day, the whole medical profession is senseless.

# IQAMS from a lecturer's perspective

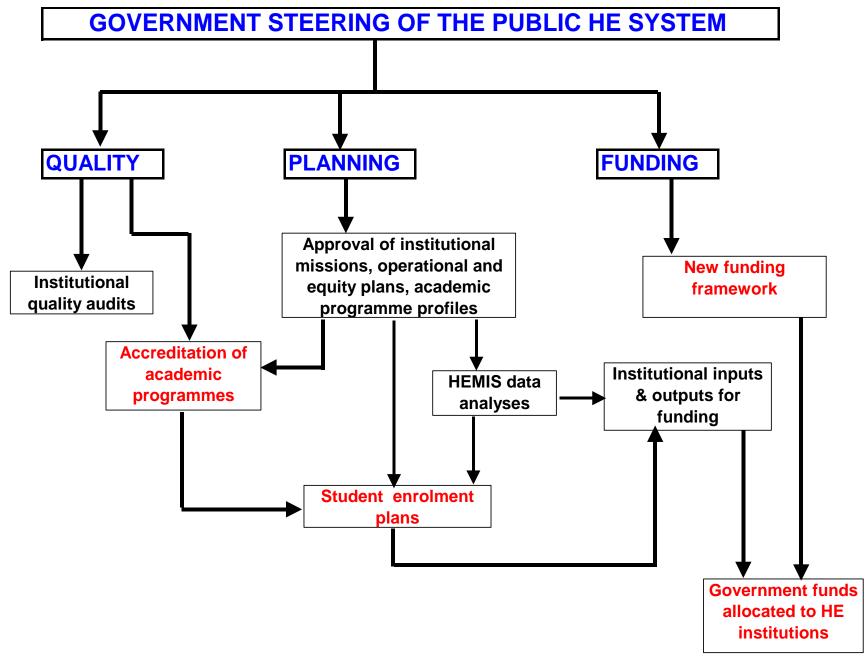

#### IQAMS from a dean's perspective

#### **IQAMS** from the perspective of

students parents employers government society

(Slide: Ian Bunting)

#### The case for Quality Management

- Quality management is a necessary condition for quality however
- quality management is <u>not</u> <u>sufficient</u> for quality

## Principle of design

Specifications are continually moving upwards Opportunity for incremental changes **Specifications** Calculate this cost Poor design Poor design **Good design** 

## What is a "Programme"

- One qualification with various programmes leading to the qualification
  - BA in International Studies
  - BA in Gender Studies
- One programme in a field with various qualifications at different levels
  - <u>"Programme in International Studies"</u> consists of a Diploma, Bachelors, Honours, Masters, PhD
  - <u>"Programme in Gender Studies"</u> consits of a Diploma, Bachelors, Honours, Masters, PhD
- One programme with various qualifications at the same level
  - Programme in public administration leading to BAdmin, BComm (Admin), BEcon (Admin), BBusSc(Admin)

### What is a "new" programme?

- Former Afrikaans Universities and the SA government
- "MScAgric in Assisted Animal Reproduction"
- New <u>programme</u> submitted by Stellenbosch University in 2001 (Serious stuff: the researchers sent sheep sperm into orbit with Mark Shuttleworth)
- Pretoria's decision: You have permission to offer the MScAgric
  - Just get on with it
  - We need not know what you do with your animals
- So as of 2002 we simply continue to assist the farm animals in Stellenbosch and we get subsidy from government

## Qualification / Programme

Level of learning	NQF Level 6
Qualification type	First Bachelor's degree ("B")
Qualification sub-type	Science ("Sc")
Qual specification or Programme	BSc in Biological Sciences
"Stream"	Molecular & Cellular Biology
Discipline / Subject	Microbiology

#### Gemiddelde Persentasie Studente wat in Minimum Tydperk Kwalifiseer in Oorspronklik Ingeskrewe Graadkursusse, 1990-1998 Kohorte

BA	40.00%	2 uit elke 5
BSc	23.84%	Amper 1 uit elke 4
BScAgric	31.28%	Amper 1 uit elke 3
BComm	26.58%	Omtrent 1 uit elke 4
BRek	46.86%	Amper die helfte
BIng	35.47%	Net meer as 1 uit elke 3
MB ChB	67.13%	2 uit elke 3!

Met die uitsondering van Medies, BA en BRek kwalifiseer minder as 2 uit elke 5 studente in die minimum tydperk (vir die gekose 7 graadkursusse).

#### Gemiddelde Persentasie Studente wat in Minimum Tydperk Plus Een Kwalifiseer in Oorspronklik Ingeskrewe Graadkursusse, 1990-1997 Kohorte

BA	54.83%	Net meer as 1 uit elke 2
BSc	37.72%	Net meer as 1 uit elke 3
BScAgric	46.01%	Amper 1 uit elke 2
BComm	46.23%	Amper 1 uit elke 2
BRek	63.48%	Amper 2 uit elke 3
BIng	57.08%	Amper 3 uit elke 5
MB ChB	76.18%	Net meer as 3 uit elke 4

In algemene graadkursusse sal omtrent 1 uit elke 2 studente na die minimum typerk plus een jaar verloop het reeds gegradueer het, terwyl vir graadkursusse met strenger toelatingsvereistes die syfer 3 uit elke 5 of beter is. BSc is egter die slegste daaraan toe - minder as 2 uit elke 5 sal na 4 jaar reeds gekwalifiseer het.

#### Gemiddelde Getal en Persentasie Studente wat die Universiteit Kwalifikasieloos na die Minimum Studietydperk Plus Vier Jaar Verlaat, 1990-1994 Kohorte

ı	ı			
l	BA	190	31.36%	Amper 1 uit elke 3!
l	BSc	127	37.02%	Meer as 1 uit elke 3!
l	BScAgric	36	40.76%	2 uit elke 5!
l	BA BSc BScAgric BComm BRek	190	36.10%	Meer as 1 uit elke 3!
l	BRek	26	15.06%	Amper 1 uit elke 6.
l	BIng	<i>7</i> 8	25.62%	l uit elke 4!
l	BIng MB ChB	32	15.29%	Amper 1 uit elke 6.

Gemiddeld verlaat 637 studente per jaar kohort die universiteit dus vir die 7 gekose graadkursusse sonder om 'n kwalifikasie te verwerf!

# Self-evaluation of programmes at Stellenbosch University 2003-4

#### Sept 2002 – decision of Senate Executive

- Conduct a self-evaluation of ALL programmes
- Not followed by site visits by external panels of peers

#### Rationale

- 1. To renew programmes
- 2. To rationalise programmes
- 3. To improve efficiency and cost-effectiveness
- 4. To conduct a first round of evaluations of the University's new programmes offered since 2000
- 5. To lay the foundation for a system of institutional programme accreditation in preparation for the Higher Education Quality Committee's (HEQC) national process of programme accreditation.

#### **Template**

- Section A formal description of programme
  - 6 questions (name, level, credits, etc)
- Section B self-evaluation report: programme
  - 9 questions
- Section C continue/discontinue the programme?
- Section D self-evaluation report: modules
  - 3 questions
- Section E continue/discontinue any modules?

#### Nine self-evaluation questions

- 1. Strategic importance (review 1999formulation)
- 2. Link with focus areas of faculty
- 3. Purpose of programme (review the 1999formulation)
- 4. Outcomes, teaching & learning and assessment
  - a) Review programme outcomes
  - b) Alignment (outcome action/delivery assessment)
  - c) Integrated assessment
  - d) Academic, competency and service standards

#### Nine self-evaluation questions

- 5. Sustainability
- 6. Overlap with other programmes
- 7. Support to underprepared students
- 8. Success of the programme
- 9. Faculty's own additional evaluation criteria

#### Overview of the evaluation process

September 2002	Senate Executive's decision
October 2002	manual & template available
Nov 2002 - March 2003	evaluation process
	<ul> <li>programme committees</li> </ul>
	• faculties
April – May 2003	institutional evaluation process
	(8 meetings; 31 hours, 5000 p.)
June 2003	Senate
August 2003 - May2004	follow-up, re-submissions, re-
	evaluations
June 2004	Senate
September 2004	Meta-evaluation

## Upshot of the 2003 process

Faculty	Reports	Pages	Not	Conditional	Approved
	submittted		approved		
Arts	103	1400	0	5	97
Natural Sciences	62	855	2	19	41
Education	17	264	0	1	16
Agricultural & Forestry	14	252	0	9	5
Sciences					
Law	8	112	0	0	8
Theology	7	88	0	1	6
Economic & Management	54	642	0	34	20
Sciences					
Engineering	18	362	0	0	18
Health Sciences	46	742	0	15	31
Military Science	21	296	2	5	14
	350	5013	4	89	256

#### Up-shot of follow-up during 2004

Faculty	Reports	Pages	Not	Conditional	Approved
	submittted		approved		
Arts	7	67	0	1	6
Natural Sciences	10	91	0	1	9
Education	1	53	0	0	1
Agricultural & Forestry	9	173	0	0	9
Sciences					
Law	0	0	0	0	0
Theology	0	0	0	0	0
Economic & Management	25	415	0	10	15
Sciences					
Engineering	0	0	0	0	0
Health Sciences	26	473	0	0	26
Military Science	5	60	0	0	5
	83	1332	0	12	71

## Initial evaluation of process by the ten faculty leaders (June 2003)

- Programme committees were established / revived
- Inter-departmental discussions
- Cost-effectiveness dominated
- Evaluation should not be used as rationalisation mechanism
- Process was too rushed
- Much work still needed on outcomes

#### Initial evaluation of process (June 2003)

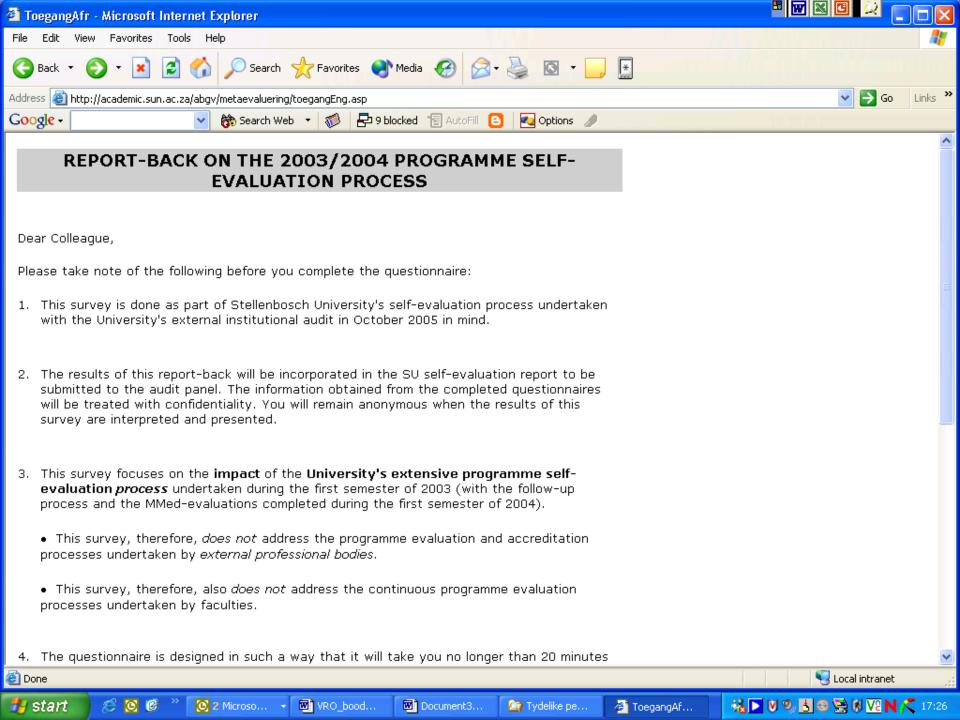

- Need to define "sustainability"
- Do not use same process for UG and PG programmes
- Data and information systems need finetuning
- No surprises, it confirmed what we already knew
- Time-consuming and challenging process
- A waste of time and resources in the case of professional programmes

#### Recommendations (June 2003)

- Clarity on outcomes and assessment should every outcome be assessed?
- 2. Develop an institutional assessment policy
- 3. Develop policies and procedures for programme coordination and management
- 4. Curricula of professional programmes not to be dictated by professional bodies
- 5. Modularise all post-graduate programmes
- 6. Establish continuous review and evaluation
- 7. Link with cost-effectiveness
- 8. Conduct a meta-evaluation

### Meta-evaluation (Sept 2004)

- Questionnaire 50 questions
- Based on rationale for the process
  - Renewal
  - Enhance cost-effectiveness and efficiency
  - Establish an evaluation system
- Direct e-mail from Vice-Rector to 188 programme coordinators
- Web-based survey
- 120 responses

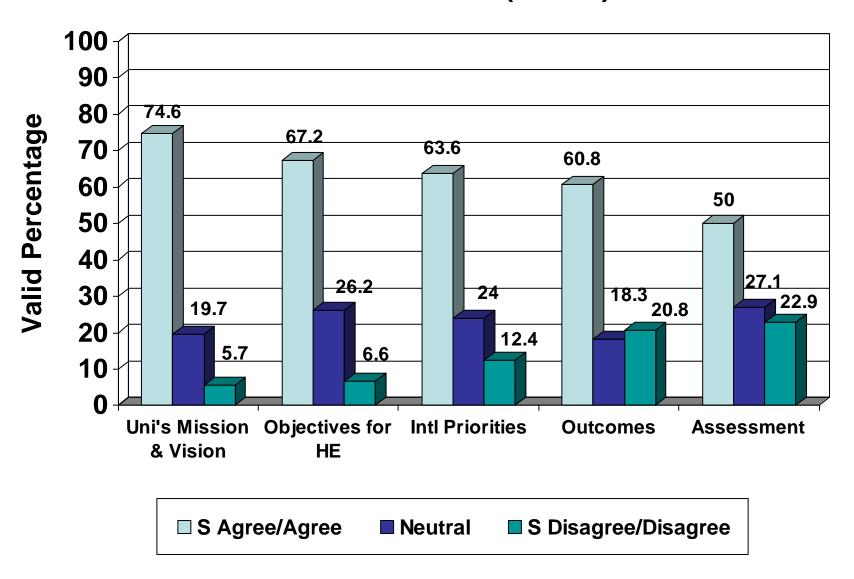

#### QUESTIONNAIRE

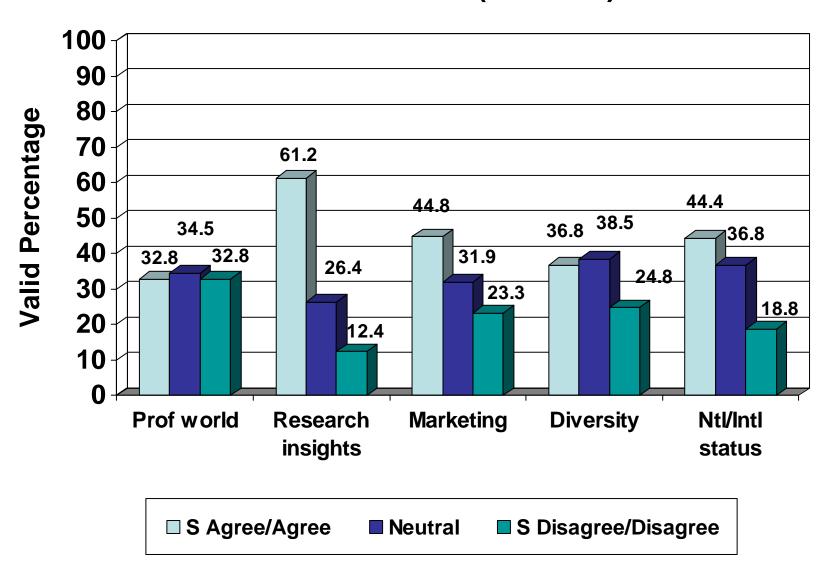

The Executive Committee of Senate has identified **renewal** as the primary objective of the programme self-evaluation process. The following statements represent different dimensions of programme renewal. The question is whether, and to what extent, the **evaluation process** has led to real renewal. Please give your honest opinion.

RENEWAL						
The 2003/2004 programme self- evaluation process prompted the programme committee to	Agree strongly	Agree	Neutral	Disagree	Disagree strongly	Not applicable
1. measure anew the strategic importance of the programme against the University's mission and vision.	0	0	0	0	0	0
<ol> <li>measure anew the strategic importance of the programme against the national objectives for higher education.</li> </ol>	0	0	0	0	0	0
3. measure anew the strategic importance of the programme against international priorities and requirements.	0	0	0	0	0	0
4. revise the programme's outcomes.	0	0	0	0	0	0
5. adapt the way in which the programme outcomes are assessed.	0	0	0	0	0	0
6. have more intensive/new interactions with the <i>professional world</i> .	0	0	0	0	0	0
7. measure programme					0	

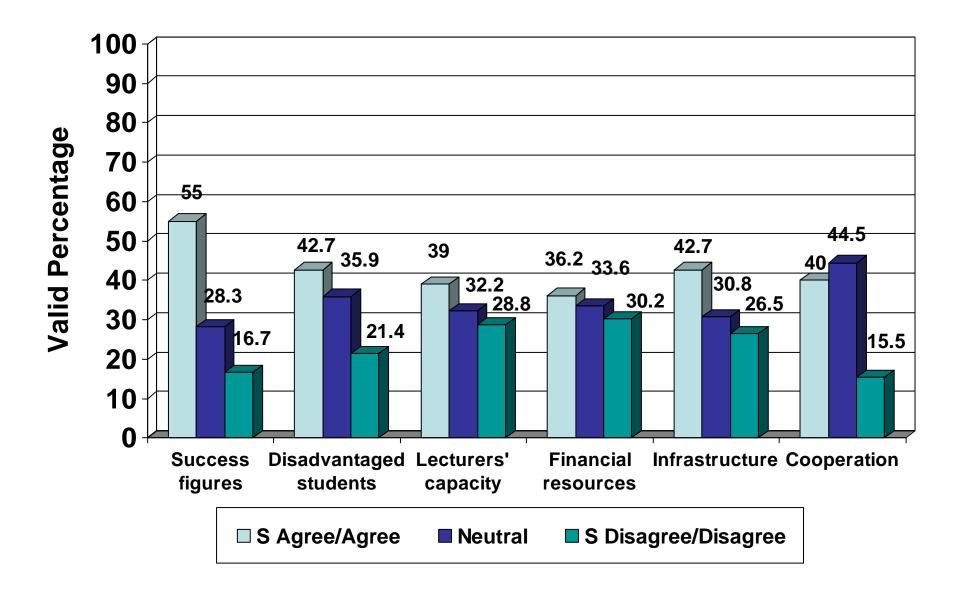

### Renewal (1-5)

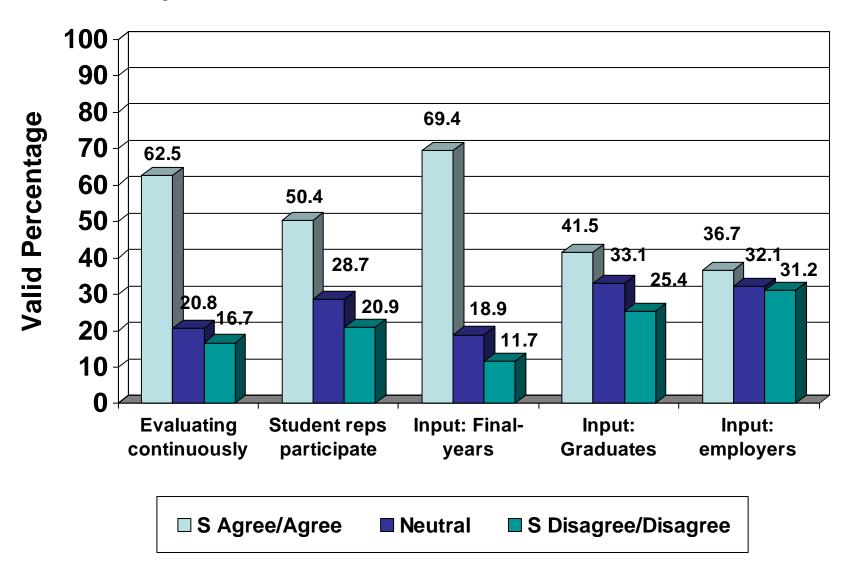

#### Renewal (6-10)

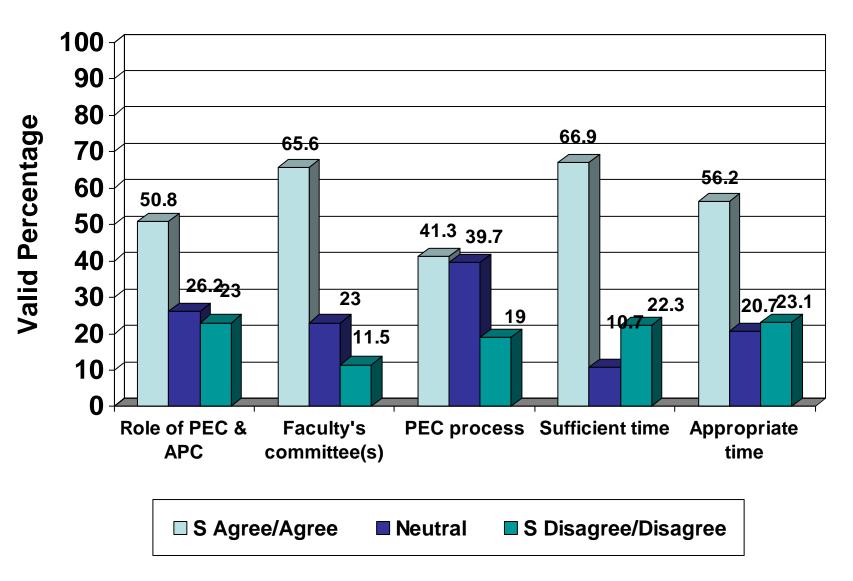

#### Cost-effectiveness and efficiency

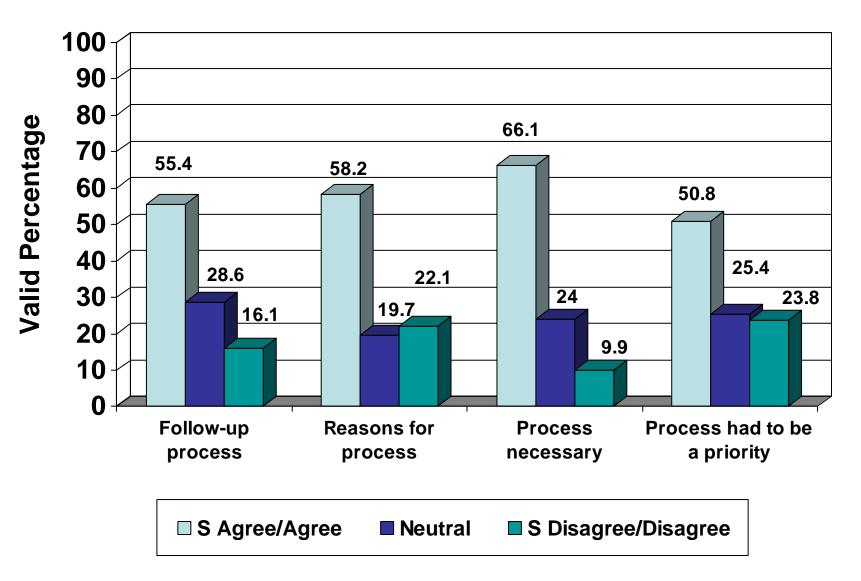

### System was established

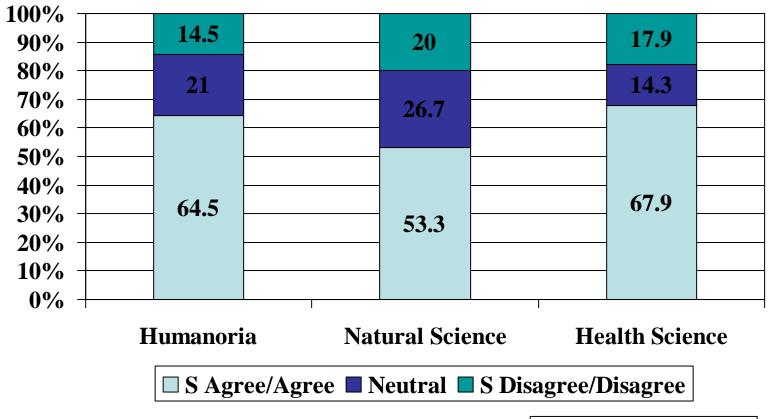

#### The evaluation process (25-29)

#### The evaluation process (30-33)

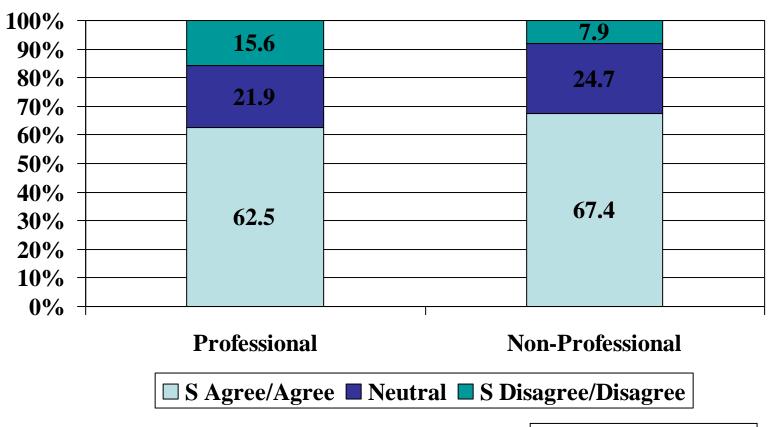

# Faculty x Programme committees now evaluating programmes continuously

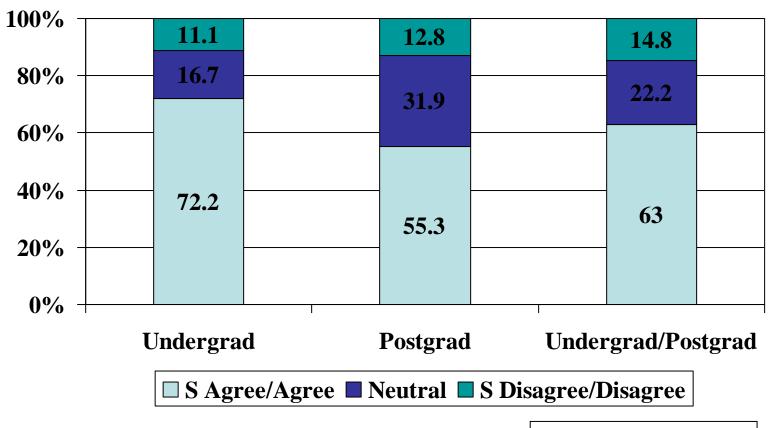

Chi-square = 2.035 p = .729 n = 120

## Prof/Non-prof x Programme evaluation process was necessary

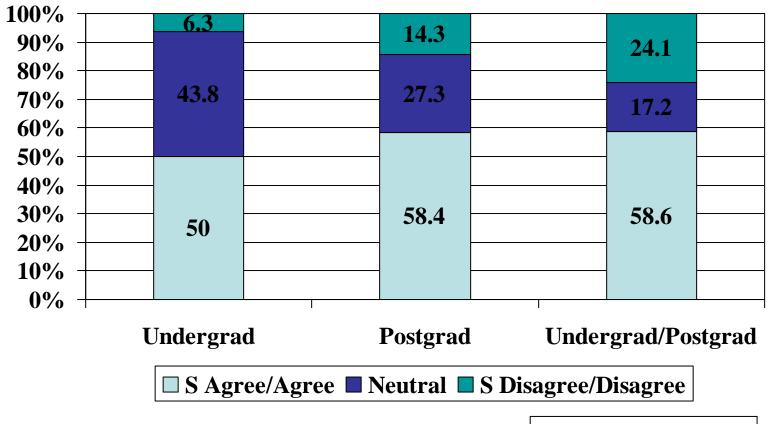

Chi-square = 1.595 p = .451 n = 121

# Undergrad/Postgrad x Template suitable for *undergrad* programmes

Chi-square = 2.137 p = .711 n = 92

# Undergrad/Postgrad x Template suitable for *postgrad* programmes

Chi-square = 5.198 p = .268 n = 122

#### Academic standards

- Are the learning outcomes appropriate for meeting the goals of the programme, and for satisfying its target market?
- Do the learning outcomes meet the standards necessary for the level and nature of the programme and qualification?
- Is there an appropriate academic focus, academic depth and balance across the programme as a whole?
- Is the programme structured in such a way that a successful student could in fact attain *all* the core outcomes of the programme?

#### Competency standards

- Does the faculty have the capacity (capabilities and systems) in place to ensure that every graduate has demonstrated through assessment the full spectrum of prescribed practical, theoretical and reflective competencies?
- To what extent can the faculty give employers and other stakeholders a guarantee that graduates of the programme have indeed met the prescribed competencies?

#### Service standards

- To what extent does the faculty succeed in in providing sufficient support and administrative services to students and lecturers?
  - e.g. accessibility to computers and the effective maintenance and support of computer facilities –hardware and software
  - e.g. sufficiency of library collection and access to academic information
