1. ☐ **Estrogen therapy and Alzheimer's dementia.**  
[Review] [79 refs]  
Craig MC. Murphy DG.  
*Annals of the New York Academy of Sciences.*  
1205:245-53, 2010 Sep.  
[Evaluation Studies. Journal Article. Review]  
UI: 20840280  

Previous studies in postmenopausal women have reported that estrogen treatment (ET) modulates the risk for developing Alzheimer's disease (AD). It has recently been hypothesized that there may be a "critical period" around the time of menopause during which the prescription of ET may reduce the risk of developing AD in later life. This effect may be most significant in women under 49 years old. Furthermore, prescription of ET after this point may have a neutral or negative effect, particularly when initiated in women over 60-65 years old. In this paper, we review recent studies that use in vivo techniques to analyze the neurobiological mechanisms that might underpin estrogen's effects on the brain postmenopause. Consistent with the "critical period" hypothesis, these studies suggest that the positive effects of estrogen are most robust in young women and in

# Creating Resource Groups

The screenshot displays the Ovid web interface with a modal dialog box titled "Add Resource Group:". The dialog has a close button (X) in the top right corner. It contains the following fields and sections:

- Group Name\***: A text input field.
- Description**: A text input field.
- All Resources\***: A list of resources with checkboxes for selection.
  - ☐ All
  - ☐ Adis Journals@Ovid
  - ☐ Books@Ovid July 27, 2012
  - ☐ Clinical Evidence Issue 15, November 2007
  - ☐ Journals@Ovid Full Text July 30, 2012
  - ☐ Your Journals@Ovid
  - ☐ PsycARTICLES Full Text
  - ☐ EIRA Journals@Ovid
  - ☐ Transplant Library July 18, 2012
  - ☐ EBM Reviews - ACP Journal Club 1991 to July 2012
  - ☐ EBM Reviews - Cochrane Central Register of Controlled Trials July 2012
  - ☐ EBM Reviews - Cochrane Database of Systematic Reviews 2005 to July 2012
  - ☐ EBM Reviews - Cochrane Methodology Register 3rd Quarter 2012
  - ☐ EBM Reviews - Database of Abstracts of Reviews of Effects 3rd Quarter 2012

At the bottom of the dialog are "Cancel" and "Save Group" buttons. The background interface shows a navigation bar with "Search", "Journals", "Books", "My Workspace", "External Links", and "OvidMD". Below the navigation bar are links for "Basic Search", "Find Citation", "Search Tools", "Search Fields", "Advanced Search", and "Multi-Field Search". On the left, there is a "1 Resource selected" section with "Ovid MEDLINE" and "Universal Search" links, and a search input field with the placeholder "Enter keyword or phrase (\* or \$ for truncation)". At the bottom left, a "Search History" section shows a table with columns for checkboxes, counts, and search terms.

# Performing a Multi-File Search

The screenshot displays the Ovid search interface. At the top, a navigation bar includes 'Search', 'Journals', 'Books', 'My Workspace', 'External Links', and 'OvidMD'. Below this, a secondary bar lists search options: 'Basic Search', 'Find Citation', 'Search Tools', 'Search Fields', 'Advanced Search', and 'Multi-Field Search'. The main content area is partially obscured by a modal dialog box titled 'Select Resource(s) to search:'. This dialog box contains two sections: 'My Resource Groups' and 'All Resources'. In the 'My Resource Groups' section, the 'Introduction course' is expanded, showing three checked items: 'Your Journals@Ovid', 'Embase 1996 to 2012 Week 30', and 'Ovid MEDLINE(R) without Revisions 1996 to July Week 3 2012'. The 'All Resources' section shows a list of resources with checkboxes, including 'Adis Journals@Ovid', 'Books@Ovid', 'Clinical Evidence', 'Journals@Ovid Full Text', 'Your Journals@Ovid', 'PsycARTICLES Full Text', and 'EIRA Journals@Ovid'. The background interface shows a search bar with the prompt 'Enter keyword or phrase (\* or \$ for truncation)' and a 'Search History' button.

OvidMD

To Remove Duplicates: select a set to dedupe, edit your Deduping Preferences using the table below, then press the "Continue" button.  
Sets which contain more than 6000 hits cannot be deduped.

Continue ➤

Select	#	Searches	Results	Search Type
-	1	is estrogen effective in the treatment of alzheimers {Including Limited Related Terms}	10725	Basic
<input type="radio"/>	2	limit 1 to (four stars or five stars)	1783	Advanced
<input checked="" type="radio"/>	3	2 and 2007:2012.(sa_year).	472	Advanced

## Edit Deduping Preferences

Field Preferences	Database Preferences
<input type="radio"/> Has Abstract	1. <input type="text" value="Embase"/>
<input type="radio"/> Has Full Text	2. <input type="text" value="Your Journals@Ovid"/>
<input type="radio"/> Has Index Terms	3. <input type="text" value="Ovid MEDLINE(R)"/>
<input checked="" type="radio"/> No Field Preference	

### ? Hints:

- Use the Field and Database Preferences options to determine how the Ovid system will dedup your set.
- Select a single Field Preference. This Field Preference will be applied first in determining which results to keep versus which results to reject when duplicates are found.
- Rank the databases based on which result format you prefer. Your Database Preferences will be applied in the order chosen, after your Field Preference criteria.
- Once your set has been deduped, you will have an opportunity to review the duplicate results.
