

I. Importing references into RefWorks from Pubmed

In **Pubmed**, mark the relevant records.

From the **Send to** option, select **Choose Destination: File** and **Format: Medline**.

Select a **Sort by** option.

Click on: **Create File**.

Merk die relevante rekords in **Pubmed**.

Op die **Send to** opsie, kies **Choose Destination: File** en **Format: Medline**.

Kies 'n **Sort by** opsie.

Klik op: **Create File**.

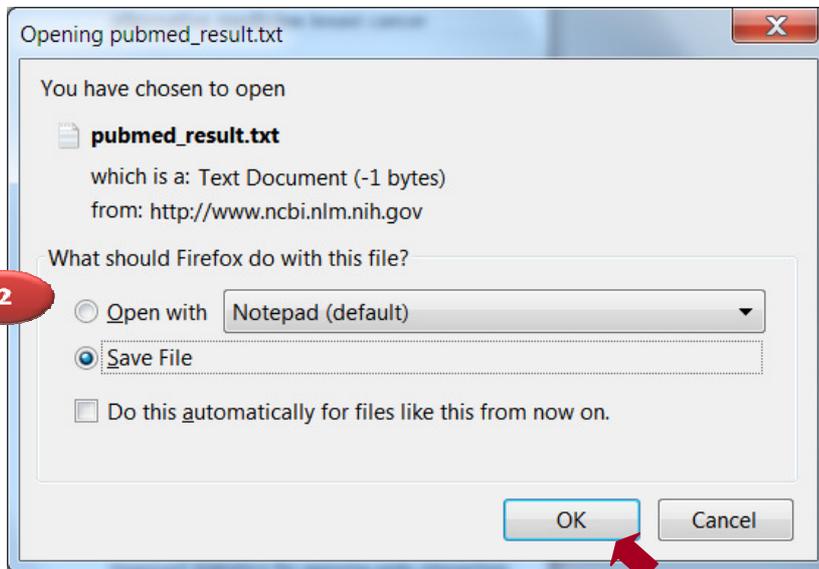

The screenshot shows the PubMed interface with a search for 'alternative medicine'. The search results are displayed in a list. A 'Send to' dropdown menu is open, showing options for 'File', 'Clipboard', 'Collections', 'E-mail', 'Order', and 'My Bibliography'. The 'File' option is selected. Below the dropdown, the format is set to 'MEDLINE' and the sort order is 'First Author'. The 'Create File' button is highlighted with a red arrow. A red circle with the number '1' is placed over the first search result.
