What's New

Britannica
in the
Blogosphere

Long known for intelligence and authority in encyclopedias and reference, we now take our act into a new medium: blogging. [Britannica Blog](#) makes its debut this week, and the only thing missing is you. Please [drop in](#) and join the conversation. As always, we're tackling everything from art to zoology.

Britannica Highlights

The three-day festival of 'Id al-Fitr marks the end of

Ramadan, the Muslim holy month of fasting. It begins on the first day of Shawwal, the 10th month of the [Muslim calendar](#)--falling on October 24 in 2006. 'Id al-Fitr is a time for communal prayer, visiting friends, exchanging gifts, and visiting relatives' graves.

UN Day

The Cold War's end in 1991 brought renewed attention and appeals to the United Nations, and since then the UN has struggled to address a myriad of conflicts,

crises, and wars, including the AIDS epidemic, famine in Africa, weapons proliferation, and the turmoil wrought by international terrorism. As the world observes UN Day this week, review the history and principles of the organization and the challenges and controversies facing it today.

Web 2.0

From Wikipedia, the free encyclopedia

Web 2.0, a phrase coined by [O'Reilly Media](#) in 2004^[*citation needed*], refers to a supposed second-generation of Internet-based [services](#) — such as [social networking sites](#), [wikis](#), communication tools, and [folksonomies](#) — that let people collaborate and share [information online](#) in previously unavailable ways. O'Reilly Media, in collaboration with MediaLive International, used the phrase as a title for a series of conferences and since 2004 it has become a popular (though ill-defined and often criticized) [buzzword](#) amongst certain technical and marketing communities.

Introduction

[edit]

Alluding to the [version-numbers](#) that commonly designate software upgrades, the phrase "Web 2.0" hints at an improved form of the [World Wide Web](#), and some people have used the term for several years.

In the opening talk of the [first Web 2.0 conference](#), [Tim O'Reilly](#) and [John Battelle](#) summarized key principles they believed characterized Web 2.0 applications:

- the Web as a platform
- data as the driving force
- [network effects](#) created by an [architecture of participation](#)
- innovation in assembly of systems and sites composed by pulling together features from distributed, independent developers (a kind of "open source" development)
- lightweight [business models](#) enabled by content and service syndication
- the end of the software adoption cycle ("the perpetual beta")
- software above the level of a single device, leveraging the power of [The Long Tail](#).

Earlier users of the phrase "Web 2.0" employed it as a synonym for "[semantic web](#)," and indeed, the two concepts complement each other. The combination of [social-networking](#) systems such as [FOAF](#) and [XFN](#) with the development of tag-based [folksonomies](#), delivered through [blogs](#) and [wikis](#), sets up a basis for a semantic environment. Although the technologies and services that make up Web 2.0 lack the effectiveness of an internet in which the machines can understand and extract meaning (as proponents of the [Semantic Web](#) envision), Web 2.0 represents a step in its direction.

As used by its proponents, the phrase "Web 2.0" refers to one or more of the following:

- The transition of [websites](#) from isolated [information silos](#) to sources of content and functionality, thus becoming [computing platforms](#) serving [web applications](#) to [end users](#)
- A social phenomenon embracing an approach to generating and distributing Web content itself, characterized by open communication, decentralization of authority, freedom to share and re-use, and "the market as a [conversation](#)"
- A more organized and categorized content, with a far more developed [deeplinking](#) web architecture than hitherto

What is Web 2.0?

- Web as a platform
- Data as the driving force
- Network effect

Today's featured article

 **0.999...** (also denoted $0.\overline{9}$ or $0.\dot{9}$) is a **recurring decimal** which is **exactly equal to 1**. In other words, the symbols 0.999... and 1 represent the same real number. Mathematicians have formulated a number of **proofs** of this identity, which vary with their level of **rigor**, preferred development of the real numbers, background assumptions, historical context and target audience. The equality $0.999... = 1$ has long been taught in textbooks, and in the last few decades, researchers of **mathematics education** have studied the reception of this equation among students, who often vocally reject the equality. Their reasoning is often based on an expectation that **infinitesimal** quantities should exist, that **arithmetic** may be broken, or simply that 0.999... should have a last 9. These ideas are false in the **real numbers**, as can be proven by explicitly constructing the reals from the **rational numbers**, and such constructions can also prove that $0.999... = 1$ directly. (**more...**)

HMS Cornwall (F99)

From Wikipedia, the free encyclopedia

See *[HMS Cornwall](#)* for other ships of the name.

The sixth and present **HMS *Cornwall*** is the first of the Batch 3 [Type 22 frigates](#) of the [Royal Navy](#).

She was launched in October [1985](#) and was commissioned at [Falmouth](#) in [1988](#) by the ship's sponsor, the late [Diana, Princess of Wales](#).

In [1993](#), *Cornwall* acted as flagship of the Battle of the Atlantic [Fleet Review](#), which commemorated of the 50th anniversary of the [Second Battle of the Atlantic](#) in [World War II](#).

In [2001](#), *Cornwall* was part of the Royal Navy Task Force sent to take part in the [invasion of Afghanistan](#). The following year, *Cornwall* performed a [21-gun salute](#) after a day of events for the [Golden Jubilee](#) of [HM Queen Elizabeth II](#).

Cornwall was again involved in the "[War on Terrorism](#)" in [2003](#) as part of [NATO's Standing Naval Force Atlantic](#). She returned to the UK later that year. In early [2004](#) the ship assumed the task of [Fleet Ready Escort](#), based in Britain. She is the lead ship of the [2nd Frigate Squadron](#) based at [HMNB Devonport](#) in [Devon, England](#).

[28th January 2006](#). *Cornwall* was rededicated in a ceremony at [Falmouth](#) attended by the ship's sponsor, Lady [Mary Holborow](#) [Lord Lieutenant of Cornwall](#).

Welcome to the Library 2.0 Wiki [\[edit\]](#)

The Library 2.0 wiki is here to serve the entire library community by bringing together a collection of resources about or relating to next-generation library services. This wiki may be used for any purpose by anyone as long as it is in the pursuit of positive change.

Some ideas for using this wiki may include:

- Discussion of L2 topics
- Organization of resources
- Library event planning
- Creation of reference pages
- Promotion of events or services
- Software or mashup distribution
- Online collaboration on projects

Please be respectful of the wiki and other people work and practice nice wiki-fu.

Wiki News [\[edit\]](#)

- [Jblyberg](#) 11:37, 20 July 2006 (EDT) I'm in the process of recovering from horrible spam problems. To get around it, editors are required to create an account and log in to make changes.
- [Jblyberg](#) 11:37, 01 April 2006 (EDT) This wiki is still young. Feel free to add your thoughts and suggestions to the [L2 Wiki Setup](#) page.

Innovation Directory

Submitted by Richard Wallis on Thu, 2006-09-14 14:41.

The TDN Innovation Directory is an open directory of Library 2.0 Technology examples.

Be they Web Sites, Widgets, Gadgets, Browser Extensions, Plug-ins, or 'mashups' of any type that demonstrate in the display, use, and reuse of data from and about libraries, you should find them in here.

This initial version of the Innovation Directory is starting as a set of web pages. Let us know what enhancements you would like - more/different fields in the description etc.

Comment on the individual entries.

Most importantly, if you come across an example of Library 2.0 Technology Innovation - let us know and we will add it to the directory.

Listen to conversations with thought-leaders at the interface between Web 2.0, Libraries, and the Semantic Web...

Happy Birthday, Library 2.0!

In this Library 2.0 Gang discussion, we look back over a year of 'Library 2.0' with the originator of the term himself, [Michael Casey](#). We then look forward to see what we hope the next year will bring in this rapidly evolving area.

A [forum](#) is available for discussion of issues raised during the programme.

Mashing up the Library Gang

In this Library 2.0 Gang discussion, we discuss results from the first global [Mashing up the Library](#) competition, winners of which were [announced](#) earlier this week. Winner of the first prize, John Blyberg, joins representatives of the team behind second prize-winning Alliance Second Life Library 2.0.

Programme participants were drawn, as usual, from the full list of Gang members, this week supplemented by our Second Life Library 2.0 members. The discussion of issues raised during the recording of the programme is available for

Amazon Elastic Compute Cloud (Amazon EC2) - Limited Beta

Amazon Elastic Compute Cloud (Amazon EC2) is a web service that provides resizable compute capacity in the cloud. It is designed to make web-scale computing easier for developers.

Just as Amazon Simple Storage Service (Amazon S3) enables storage in the cloud, Amazon EC2 enables "compute" in the cloud. Amazon EC2's simple web service interface allows you to obtain and configure capacity with minimal friction. It provides you with simple, scalable, and cost-effective computing resources in the Amazon's proven computing environment. Amazon EC2 reduces the time required to obtain and boot new server instances in minutes, allowing you to quickly scale capacity, both up and down, as your computing requirements change. Amazon EC2 changes the economics of computing by allowing you to pay only for capacity that you actually use.

Amazon EC2 Functionality

Amazon EC2 presents a true virtual computing environment, allowing you to use web service interfaces to requisition machines for use, load them with your custom application environment, manage your network's access permissions, and run your image using as many or few systems as you desire.

To use Amazon EC2, you simply:

- ◆ Create an Amazon Machine Image (AMI) containing your applications, libraries, data and associated configuration settings. Or use our pre-configured, templated images to get up and running immediately.
- ◆ Upload the AMI into Amazon S3. Amazon EC2 provides tools that make storing the AMI simple. Amazon S3 provides a safe, reliable and fast repository to store your images.
- ◆ Use Amazon EC2 to launch instances with access.
- ◆ Use Amazon EC2 to manage many instances of your AMI as needed.

Reporting from Iraq

Anthony Shadid, winner of the Pulitzer Prize for reporting from Iraq, will make a special Library appearance on Sun., Oct. 29 at 3 pm at the downtown Library. Shadid has reported for the AP, The Boston Globe and The Washington Post. He will discuss his experiences in Iraq and his award-winning book, *Night Draws Near: Iraq's People In The Shadow of America's War*, a compellingly human story of life in war-torn Iraq. Shadid, an Arab American, was neither embedded with soldiers nor briefed by politicians while in Iraq.

Talis Keystone

Submitted by Mohammed Hossain on Mon, 2006-09-04 16:21

Talis Keystone

The Library Management System (LMS) is a suite of products designed to meet the diverse needs of a library and its users, often in the context of a larger organisation. Talis Keystone provides an integration platform which enables you to integrate your LMS with other systems in the institution such as the student portal, council website or the CRM system. Talis Keystone is a Service Oriented Architecture (SOA) middleware layer which is deployed into the institution and delivers services to and from the LMS via industry standard Web Services.

The first integration module we offer is called View My Account. This provides SOAP and REST Web Services for a client application to consume the details of a borrower's account in an integrated application. For example, a student could log into the portal system provided by their university, check their email, see what lectures they have that day and also see a summary of their library account – all without leaving the student portal; except when they decide to click on the single sign-on link and go directly into their OPAC, signed in, into their account! This library account data and the single sign-on link is provided by the Talis Keystone View My Account integration module and is the result of real time interoperability with the SOAP or the REST Web Service.

Toolkit

To enable developers a quick and easy access to Talis Keystone Web Services, we provide various open source toolkits for different platforms. Currently, you can [download](#) a toolkit for the Java and the .NET platform for free. The toolkits contain everything you need to rapidly integrate your LMS with other systems in your organisation.

We use industry standard Web Services so even if a toolkit is not available for your favourite environment you can still use Talis Keystone for your integration projects. If you have a specific requirement or something to share, [come and join the discussion in the forum.](#)

Talis Keystone sandbox

If your organisation has not yet purchased Talis Keystone but you would like to see what Talis Keystone has to offer, you can use the Talis Keystone sandbox, which provides a live and accessible instance of Talis Keystone. It is not a development environment for developing new content, but it does provide a live environment for developing integration solutions. The sandbox is available at www.talis.com/tdn/keystone.

The Talis Community Licence (draft)

Submitted by Ian Davis on Fri, 2006-04-21 11:58.

Note that this is a draft version of the licence

The Talis Community Licence is intended to guarantee your freedom to use, share and modify data and to preserve the availability and accessibility of such data for the wider community.

Definitions

- You means an individual or a legal entity exercising rights under, and complying with all of the terms of, this Licence, provided that you acknowledge that you are bound by the Licence.
- Initial Data means the data protected by database rights which is entered under the terms of this Licence consisting of the Initial Data or Contributions or the combination of Initial Data and Contributions, in each case including portions thereof.
- Contributor means each entity that creates or contributes to the creation of Contributions.
- Contributing means any addition to or deletion from the substance or structure of either the Initial Data or any Contributions.
- Original Author means the individual (or entity) who created the Initial Data.
- Licence means this document.
- Derived Work means any work based upon the Initial Data or any Contributions, in whole or in part.
- Part means a portion of the Initial Data or any Contributions.

Licence Terms

Original Author Grant

Subject to third party intellectual property claims, the Original Author hereby grants You a world-wide, royalty-free, non-exclusive licence to:

- (a) use, reproduce, display, transmit, sublicense, sell and distribute copies of the Initial Data with or without Contributions; and
- (b) modify Your copy of the Initial Data or any portion of it thus forming a Derived Work; and
- (c) use, reproduce, display, transmit, sublicense, sell and distribute such Derived Work provided that You cause any Derived Work that contains or is derived from the Initial Data or any Contributions to be distributed under the terms of this Licence.

About Collections

You are viewing the description of a collection. Silkworm enables rich descriptions of collections to be created and maintained by any registered user. In addition every collection has one or more identifiers which may be used to refer to the collection in many Talis Platform services.

Are you familiar with this collection?

You could improve the information about this collection by adding a short description of its contents. Just click the "Modify Details" link.

The web pages on this site are licenced under a [Creative Commons Licence](#). The data is licenced under the [Talis Community Licence](#). By accessing this site and its associated services you are agreeing to abide by the [Terms of Service](#).

Signpost Libraries

Signposting you to book and DVD reviews, and online resources for your community. Brought to you by Bolton, Trafford and Wigan libraries.

TUESDAY, MAY 02, 2006

➤ Search Signpost

I've added a fairly rudimentary search form for [Signpost](#) to the sidebar. The form will search the titles of web pages and other resources listed in Signpost, which is something that's not currently available.

Type the name of your resource (e.g. British Standards, IMDb etc.) then click on Find. It's not the best search function ever, but it will be improved.

Update:

The Signpost search function has been improved slightly, after a bit of a rethink. It will still only search items' titles, but since nothing in Signpost itself will do that, I think it's pretty valid.

I've added another search box for Signpost, so it's now possible to search for a subject. It's still a bit clunky, but it seems to work. Type in your subject (e.g. business, books, cycling) and you should find some lists of websites and other resources in Signpost that suit your needs.

Zakas, Nicholas C.

Details

Title	<i>Professional JavaScript for Web developers</i>
Author	Zakas, Nicholas C.
Publisher	Indianapolis, Ind. , Wiley,
Year	2005
ISBN	97807645790810, 0764579088, 9789780764579089, 9780764579080

Description

Includes index.

- * Dispels the myth that JavaScript is a "baby" language and demonstrates why it is the scripting language of choice used in the design of millions of Web pages and server-side applications
- * Quickly covers JavaScript basics and then moves on to more advanced topics such as object-oriented programming, XML, Web services, and remote scripting
- * Addresses the many issues that Web application developers face, including internationalization, security, privacy, optimization, intellectual property issues, and obfuscation
- * Builds on the reader's basic understanding of HTML, CSS, and the Web in general

How do I get involved?

If you work at a library, we welcome you to contact us and share your holdings with the Talis Platform, to increase the visibility of your holdings, improve access and use of your collections.

If you would like to see your library's data within the Talis Platform and Project Cenote, why not forward this link to your library? http://cenote.talis.com/get_involved

If you would like to find out more about how to contribute to the Talis Platform contact grant.white@talis.com or join in our discussion at www.talis.com/tdn/cenote/forum.

Want to join our review panel?

End users and library innovators are being shortlisted to play a leading role in reviewing Project Cenote beta launches, shaping future developments. Are you up to the challenge? Contact Paul Miller at paul.miller@talis.com to find out more.
