

AI Disclaimer Statement for the Licensed Subscriptions

SU staff, students, post-doctoral fellow, contract workers and visiting lecturers or consultants agree to the below statement, and warrant that they will adhere to these provisions and indemnify SU against any claims from potential infringement and disciplinary action.

AI tools are trained through reproduction and adaptation of third-party copyrighted content, without the copyright owners' consent or license, and may therefore result in potential infringement. Due to institutional license agreements governing subscribed electronic resources, this content may only be used in accordance with the contractually agreed to terms and conditions.

SU staff, students, post-doctoral fellows, contract workers and visiting lecturers or consultants acknowledge they are responsible for ensuring that they do not use any of the subscription e-resources for the purposes of machine learning, algorithmic development, testing or enhancing, or any other artificial intelligence (AI) purposes, except where the data of the subscription resources is used locally only in a self-hosted environment, the data processed is not shared with unauthorised third parties, and the related terms and conditions permit use for these purposes.

Caution must be exercised when engaging in any of the following activities e.g. systematic downloading, distribution, printing, retention of substantial portions of content or transmitting licensed content into third-party applications, as these activities may potentially violate contractual terms and conditions.

Non-compliance of these terms and conditions may result in the suspension of access to the resource for the entire University community due to breach of contract, potential infringement of third-party copyrighted content and may incur disciplinary action from the University as well as civil and potential criminal charges being laid.

SU will not be held liable for any infringements of any third-party copyright material, to this extent, you indemnify SU, its staff and affiliates of any claims whatsoever which arise because of unauthorized or improper use of AI tools.
